

# Want to see your brain waves?

We are investigating how different speakers process words using brain imaging. We invite you to participate in our research study!

**WHO:** 18-45 years old

- No prior history of neurological, learning or language related disorders
- **Native English speakers** with little/no knowledge of other languages
- **Native Chinese speakers** with intermediate+ English skills\*
- **Native Turkish speakers** with intermediate+ English skills\*

\*Late second language learners who became proficient in English after the age of 10

**WHAT:** You will complete two word tests in English on a computer while we record the electrical activity of your brain! (painless and non-invasive method).

**WHERE:** Bilingualism Language and Brain Lab, UF Turlington Hall

**HOW LONG:** 1-2 hours

**COMPENSATION:** You can receive 10\$ or course credit upon instructor approval.

Principal Investigator: Dr. Eleonora Rossi University of Florida
